

K Satya Narayan Subudhi

Senior Full Stack Developer | Python | FastAPI | React | TypeScript | AI Automation | Cloud Platforms

Bengaluru, India | 9937446070 | satyasubudhi2026@gmail.com | LinkedIn: linkedin.com/in/satya-subudhi | GitHub: github.com/satya00089

PROFESSIONAL SUMMARY

Senior Full Stack Developer with 8+ years of experience delivering enterprise cloud platforms, AI automation systems, and scalable full-stack applications at Unisys. Strong hands-on expertise in Python, FastAPI, React, TypeScript, LangGraph, LangChain, RAG, PostgreSQL, MongoDB, Azure, AWS, Terraform, and CI/CD, with experience building reusable UI components, workflow dashboards, micro frontend capabilities, backend APIs, automation workflows, and cloud platform services. Delivered solutions across AppCare AI, Core Atomic, CMP cloud management, and Linesite risk analytics, with focus on platform reliability, engineering automation, and business workflow optimization.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL, NoSQL, HTML, CSS

Backend / APIs: FastAPI, REST APIs, Async Programming, Microservices, MCP, LangGraph, LangChain

AI & Automation: Agentic AI Workflows, RAG, LLM Orchestration, Tool Calling, AI-assisted Development, Scikit-learn

Frontend: React, TypeScript, Redux, Tailwind CSS, Material UI (MUI), Micro Frontends, Module Federation, React Router, reusable component design

Cloud & DevOps: Azure, AWS, Terraform, Infrastructure as Code (IaC), CI/CD, Azure DevOps

Databases / Tools: PostgreSQL, MongoDB, DynamoDB, Git, GitHub, Jira, Google Analytics, VS Code

PROFESSIONAL EXPERIENCE

Unisys India Pvt Ltd - Senior Full Stack Developer | Bengaluru, India | Jul 2024 - Present

- Architected multi-agent AI workflows across 2 enterprise ticketing systems, Jira and ServiceNow, using LangGraph, LangChain, Python, and FastAPI.
- Engineered FastAPI services with 3 core layers: REST APIs, asynchronous orchestration pipelines, and automation workflows.
- Built React and TypeScript workflow screens for AI-assisted engineering automation, including ticket analysis views, recommendation panels, and developer productivity dashboards.
- Orchestrated LLM-based agents using 4 AI capabilities: state management, tool calling, knowledge retrieval, and task automation.
- Partnered with 3 stakeholder groups - product, platform, and engineering - for the 2024-2026 AppCare AI program.

Unisys India Pvt Ltd - Full Stack Developer | Bengaluru, India | Jul 2021 - Jul 2024

- Launched cloud management capabilities across 5 workflow areas: migration, orchestration, provisioning, CI/CD, and deployment management.
- Developed React/TypeScript micro frontend modules for CMP across migration, orchestration, provisioning, CI/CD, and deployment management workflows.
- Designed reusable UI components, shared frontend utilities, and platform screens integrated with Python/FastAPI backend services.
- Standardized Terraform Infrastructure as Code modules across 2 cloud environments, Azure and AWS, for platform engineering teams.
- Strengthened CMP platform scalability, reliability, and operational efficiency over a 3-year delivery period from 2021-2023.

Unisys India Pvt Ltd - Associate Full Stack Developer | Bengaluru, India | Mar 2018 - Jul 2021

- Designed multi-tenant risk assessment capabilities across 4 use cases: threat analytics, monitoring, reporting, and workflow automation.
- Built React-based analytics and reporting screens for multi-tenant Linesite risk assessment workflows.
- Constructed scalable backend APIs and React frontend modules for 2 Linesite areas: analytics workflows and reporting features.
- Coordinated delivery with senior engineers and cross-functional stakeholders across 3 streams: backend, frontend, and analytics.

SELECTED PROJECTS

AppCare AI Engineering Initiative | 2024-2026

- Led AI-driven engineering automation across 3 focus areas: ticket analysis, implementation planning, and developer workflow optimization.
- Modeled enterprise AI workflows with 5 technologies: LangGraph, LangChain, RAG, FastAPI, and asynchronous processing.
- Built React/TypeScript workflow screens for ticket analysis, implementation planning, and developer productivity use cases.

Core Atomic | 2024

- Created Terraform modules and provisioning workflows for 2 goals: IaC standardization and cloud environment consistency.
- Automated infrastructure management for 2 engineering groups: DevOps teams and platform engineering teams.

CMP - Cloud Management Platform | 2021-2023

- Produced cloud management capabilities across 5 workflows: migration, orchestration, provisioning, CI/CD, and deployment management.
- Built React/TypeScript micro frontend modules for cloud operations, provisioning, deployment automation, and platform reliability workflows.
- Integrated micro frontends with Python APIs and cloud automation services to support Azure and AWS management use cases.

Linesite | 2018-2021

- Expanded multi-tenant analytics and risk assessment features across 3 capabilities: threat monitoring, reporting, and data processing.
- Built React-based reporting and analytics UI features connected to backend APIs for enterprise risk workflows.

CERTIFICATIONS

- Completed 2 certifications: Claude Certified Architect Foundations Certification and Microsoft Certified: Azure Fundamentals.

EDUCATION

Biju Patnaik University of Technology - Bachelor of Technology (B.Tech), Graduated 2017
